SUPPLEMENTAL RESPONSE

The unexecuted copy previously filed is substantially identical to the executed DECLARATION filed herewith. The executed DECLARATION differs from the unexecuted version at page 7, 8, 9, 12, 15, 26 and 27 (referring to the unexecuted version). Minor typographical errors are corrected on pages 7, 8, 9, 12 and 27, a duplicative section (page 9 of the unexecuted version) is deleted; the sentence "The α -chemokine . . . array of cell type." in the middle of page 12 is deleted, a sentence is added right before "Summary and conclusions" on page 15.

As discussed in the response, mailed October 9, 2002, the DECLARATION provides evidence to establish that the methods operate as claimed and the specification teaches one of skill in the art to practice the methods without undue experimentation. The DECLARATION also describes and explains that, although chemokines were originally classified as "cytokines", they are a very different class of molecules compared to classical cytokines, such as Il-2.

In view of the above remarks, and the amendments and remarks of record, reconsideration and allowance of the application are respectfully requested.

Respectfully submitted,
